

a contact portion for electrical connection to the TFT is disposed at a part of the pixel electrode; and

an insulating layer is embedded in a recess portion provided at the contact portion.

2. (Twice Amended) A display device comprising a pixel matrix circuit constituted by a plurality of pixels each including at least one TFT and a pixel electrode connected to the TFT, wherein:

the pixel electrode includes a lamination structure of a first metal layer and a second metal layer; and

an insulating layer is put between the first metal layer and the second metal layer at a contact portion where the first metal layer is connected with the TFT.

3. (Twice Amended) A display device comprising a pixel matrix circuit constituted by a plurality of pixels each including at least one TFT and a pixel electrode connected to the TFT, wherein:

the pixel electrode includes a lamination structure of a first metal layer and a second metal layer;

an insulating film is embedded in a recess portion disposed on the first metal layer; and

the second metal layer is disposed so as to cover the first metal layer and the insulating film.

4. (Amended) A display device according to claim 2 or 3, wherein at least one of the first and the second metal layer has a single layer structure or a lamination structure.

12 5. (Amended) A display device according to claim 2 or 3, wherein the first metal layer is made of a material selected from the group consisting of Ti, Cr, Ta, W, Mo, Nb and Si, and the second metal layer is made of a material selected from the group consisting of Al, Cu, Ag, and metal films mainly containing those elements.

6. (Amended) A display device according to any one of claim 1 to 3 wherein the insulating layer is an organic resin film of at least one material selected from the group consisting of polyimide, polyamide, polyimide amide, and acryl.

7. (Amended) A display device according to any one of claims 1 to 3 wherein the insulating layer is a light absorbing layer.

28. (Amended) A display device according to claim 3, wherein at least one of the first and the second metal layer has a single layer structure or a lamination structure.

13 29. (Amended) A display device according to claim 3, wherein the first metal layer is made of a material selected from the group consisting of Ti, Cr, Ta, W, Mo, Nb, and Si, and the second metal layer is made of a material selected from the group consisting of Al, Cu, Ag, and metal films mainly containing those elements.

30. (Amended) A display device according to claim 2, wherein the insulating layer is an organic resin film of at least one material selected from the group consisting of polyimide, polyamide, polyimide amide, and acryl.

C3  
cont. 31. (Amended) A display device according to claim 3, wherein the insulating layer is an organic resin film of at least one material selected from the group consisting of polyimide, polyamide, polyimide amide, and a acryl.

---

C4 34. (Amended) An electronic equipment comprising a display device according to claim 2, as a display.

35. (Amended) An electronic equipment comprising a display device according to claim 3, as a display.

---

38. (Amended) A display device according to claim 1 wherein said light absorbing layer comprises a resin in which a pigment or a carbon-based material is dispersed.

C5 39. (Amended) A display device according to claim 2 wherein said light absorbing layer comprises a resin in which a pigment or a carbon-based material is dispersed.

40. (Amended) A display device according to claim 3 wherein said light absorbing layer comprises a resin in which a pigment or a carbon-based material is dispersed.

---

Please add new claims 66-80 as follows:

66. (New) A display device according to claim 1 wherein said device is a portable telephone.

67. (New) A display device according to claim 1 wherein said device is a video camera.

68. (New) A display device according to claim 1 wherein said device is a mobile computer.

69. (New) A display device according to claim 1 wherein said device is a rear projector.

70. (New) A display device according to claim 1 wherein said device is a front projector.

C4 71. (New) A display device according to claim 2 wherein said device is a portable telephone.

72. (New) A display device according to claim 2 wherein said device is a video camera.

73. (New) A display device according to claim 2 wherein said device is a mobile computer.

74. (New) A display device according to claim 2 wherein said device is a rear projector.

75. (New) A display device according to claim 2 wherein said device is a front projector.

76. (New) A display device according to claim 3 wherein said device is a portable telephone.
